Q2: Write a program to accept principal, interest rate, and years from the user and calculate simple interest.

Q2: Write a program to accept principal, interest rate, and years from the user and calculate simple interest.

```java
import java.util.Scanner;

public class Q2SimpleInterest {
    public static void main(String[] args)
    {
        double principal;

        Scanner sc = new Scanner(System.in);

        System.out.println("Enter the Principal Amount:");
        principal = sc.nextDouble();

    }
}
```

How do we accept user input from the console?

Q3: Write a program to input the following from a user.
1. Number of items sold
2. Total selling price
3. Total profit

Calculate and print the cost per unit.
